Profile

4th-year Telecom & Network Engineering student at ENSTICP with a strong foundation in routing & switching, VLANs, TCP/IP, wireless networks, and fiber optics, supported by CCNA-level training and hands-on projects. Strongly interested in AI, Machine Learning, and Deep Learning, with experience developing practical AI projects and frontend applications. Experienced through internships, hackathons, and technical leadership roles, combining telecom, software development, and AI to build innovative solutions.

Experience

- Audit Management Platform for ISO Certification, *Algerie Poste, Intern*** 07/2026 – Present
- Developed frontend and backend features for an ISO certification audit management platform.
 - Worked on AI and computer vision projects for image analysis, report generation, and audit decision support.
 - Developed data driven approaches to assist in selecting postal offices for subsequent audit stages.
- STEAM Mentor, *World Learning Algeria*** 07/2026 – Present
- Delivered hands on STEAM and robotics workshops for students aged 8–18, guiding students through robot building, programming logic, and real-world challenges.
 - Developed mentoring, communication, teamwork, and workshop facilitation skills while working with diverse groups of learners.
- IT Manager, *FTC (Future tech club)*** 10/2025 – Present
- Orchestrated and led technical workshops (Cloud, Cybersecurity, Networking) for fellow students.
 - Contributed to a hackathon as an organizer coordinating workshops and managing external relations.
- Internship, *Cybright*** 09/2025 – 10/2025
Cybears, Hydra
- Contributed to multiple research projects and tasks, and presented them to Cybright department.
 - Exhibitor and B2C/B2B assistant at 3 days Formatech event, improving communication and negotiation skills.
 - Discovered introductory concepts in cybersecurity within a professional environment.
- Internship, *ATM Mobilis*** 01/2024 – 02/2024
Baba Ali, Algiers
- Conducted an on site visit to a live telecom terminal, observing real operational infrastructure including radio, transmission, and energy systems.
 - Explored mobile network architecture across 2G (GSM), 3G (UMTS/HSPA), 4G (LTE) and 4G+ (LTE Advanced), gaining hands on understanding of cellular network evolution.

Education

- Ai forge_Program** 03/2026 – Present
Algiers
- Learning core AI modules with weekly hands on model building across supervised, unsupervised learning and clustering, supported by cross disciplinary workshops, all leading toward a capstone AI project.
- National Higher School of Information Technologies and Communications (ENSTICP)** 2023 – Present
Eucalyptus, Algiers

Projects and Competitions

- ForsaTic, *Hackathon*** 12/2025 – 12/2025
Sidi Abdelallah
- Participated in the ideathon phase, developing and pitching a project idea in front of a jury panel.
 - Competed in the datathon as a first hands on exposure to AI, working with a real Algérie Télécom dataset to explore data driven insights.
- Nasa Space App Challenge** 09/2025 – 09/2025
- Developed a game for farmers, to help them use Nasa data and using AI to predict the soil health.
- World Learning Algeria, *Youth Week*** 08/2025 – 08/2025
- Created an Augmented Reality game in Unity to teach kids about sustainability during a competition.
 - Developed a full marketing plan and business model to support the game's launch and impact.
- CTO Forum, *Representative of ENSTICP and FTC (future tech club)*** 02/2025 – 02/2025

Skills

Web Development

HTML, CSS, Java script, basic WordPress, react js, next js, Git & github

Networking

Cisco Networking Basics (CCNA level), Cisco packet tracer, Routing and switching

Languages

Arabic-Native French-C1 level English-C1 level
